

New England Stormwater Workshop

Rinker Materials invites you to attend a complimentary New England Stormwater Workshop. (PHD's = 3.5)

Tuesday November 18, 2014
Time: 8:30 am to 12:00 noon (Registration starts at 8:00 am)
The Engineering Center/Aldrich Conference Center
One Walnut Street
Boston, MA 02108
www.engineers.org

Workshop Topics will include:

Massachusetts Municipal Separate Storm Sewer System (MS4) Draft Permit Overview

The new Massachusetts Draft MS4 Permit will significantly change stormwater management and controls in Massachusetts. The draft permit is currently available for public comment and Thelma Murphy will overview the permit and highlight some of the significant changes.

Presenter: Thelma Murphy, Chief, Stormwater and Construction Permits Section, USEPA Region 1

State of Massachusetts Perspective on Stormwater Management Permits

As USEPA gears up to issue its new municipal stormwater rules, what changes in stormwater management can be expected in Massachusetts over the next few years? Frederick Civian will discuss these upcoming changes and other emerging stormwater management initiatives.

Presenter: Frederick Civian, Stormwater Coordinator, Massachusetts DEP

Stormceptor® – Specialty Models for Special Challenges

The Stormceptor EOS System provides exceptional hydrocarbon spill protection in both dry and wet weather. Jordan Kahlenberg and Ben Farrell will discuss the EOS System and other Stormceptor specialty models aimed to meet your project requirements.

Presenters: Jordan Kahlenberg, Senior Design Engineer – Imbrium Systems
Ben Farrell, Senior Design Engineer – Imbrium Systems

New Connecticut Construction Stormwater General Permit

CT DEEP recently reissued the General Permit for the Discharge of Stormwater and Dewatering Wastewaters from Construction. Christopher Stone will discuss the new permit and some significant changes including new post-construction stormwater standards, third party plan review and certification, LID and runoff reduction, and emphasis on impaired waters.

Presenter: Christopher Stone, P.E. CT Department of Energy and Environmental Protection (DEEP)

Stormceptor® Applications – New England and Nationally

Stormceptor® is currently providing stormwater treatment in over 300 cities and towns in New England with over 6,000 systems in service. Unique Stormceptor applications in New England and nationally will be discussed.

Presenters: Ernie Carrasco, Stormceptor National Product Manager – Rinker Materials
John F. Czach, P.E., New England Region Engineer – Rinker Materials
